MANCO JR.

IT'S A TOOL OF 1001 USES for Industrial, Automotive, Farm and Home Workshop. And the Manco Jr. is ruggedly built to give real service.

Industrial Use

Automotive Repair Shop

Farm Use

Home Workshop

There has long been a vital need for a low-priced, medium size cutter such as the Manco Jr.

It offers power—only 50 pounds pressure at the handles gives you **TWO TONS** cutting force at the jaws. It's precision built with cutting jaws of the finest heat treated tool steel. And it's compact to fit conveniently in a tool kit.

The name "MANCO" too, means that behind the design, development and production of The Manco Jr. is the same "know-how" of manufacturing that has made the line of Manco and Carolus bolt cutters outstanding in their field.

The Manco Jr. can be used to cut mild steel bolts, rods up to $\frac{1}{4}$ " diameter, screws, rivets, nails, fencing, wire strapping—in fact any material up to heat treated or hardened steel.

Colorful counter cards (1 per dozen tools) and other dealer helps including newspaper mats are available upon request. Tools are individually packaged, packed 12 to the carton. Freight allowance 100 lbs. (8 dozen). Individual weight $1\frac{1}{4}$ lbs. each. The Manco Jr. is a big volume profit item.
